

BitcoinIRA Selects Dillon Gage to Supply Digital Gold™ **Stability of a gold-backed, digital asset a natural fit for crypto exchanges**

ADDISON, Texas (Feb. 19, 2019) – [Dillon Gage](#), one of the world’s largest precious metals wholesale firms and industry-leading technology innovator, has been selected by Los Angeles-based [BitcoinIRA](#) to provide the physical gold backing for customers investing in their new Digital Gold product. Digital Gold is an innovative, proprietary solution that allows customers to instantly buy and sell investment-grade, pure physical gold 24/5. Digital Gold combines the stability of gold with the speed of ETFs, and customers have 100 percent direct ownership of their physical gold.

“As one of the pre-eminent physical gold bullion firms, it is our honor to have been selected to provide this service to BitcoinIRA’s customer base,” said Mark Furmanek, COO of Dillon Gage. “Our forward-thinking executive team has put a lot of time, effort and research into positioning Dillon Gage as an appropriate partner for backing digital and cryptocurrency assets, which we believe will become a flourishing market for institutional and individual investors.”

BitcoinIRA is billed as the world's first and largest digital asset IRA company that allows customers to purchase cryptocurrencies and other digital assets for their retirement accounts. Investors can use their individual IRA accounts to trade in popular cryptocurrency options including Bitcoin, Ethereum, Ripple, Litecoin, Bitcoin Cash and Ethereum Classic—all backed by physical gold stored by Dillon Gage.

BitcoinIRA.com’s COO and co-founder Chris Kline added “We are proud to expand our product offering with the launch of Digital Gold and to have Dillon Gage as our strategic provider. Before this innovation gold buyers had to choose between dollar-derived proxy ETF certificates or slow, expensive physical gold. We are disrupting the industry by offering the best of both products and making them tradeable 24/7 on our propriety IRA platform.”

Products such as BitcoinIRA’s Digital Gold allow investors to tap into blockchain technology for the most secure form of investing in physical precious metals, all insured and professionally stored in the vaults of the Royal Canadian Mint. Through this alliance, investors have the option to easily convert their digital gold investment amounts to fabricated physical metal equivalents and take delivery at any time they wish.
