

Dillon Gage Metals DGGold™ a Breakthrough for IRA Community Investors can now track and accumulate pure physical gold

ADDISON, Texas (Oct. 9, 2018) – [Dillon Gage Metals](#), one of the world’s largest precious metals wholesale firms, is connecting the IRA investment community with a new and innovative alternative asset for their clients—DGGold. DGGold provides direct ownership of physical gold tracked by Blockchain technology.

With DGGold, self-directed IRA investors can now conveniently, swiftly and securely diversify their retirement portfolios with any amount of physical gold—all without incurring any fabrication or storage fees. No other alternative asset on the market can make these claims.

“The interest level we’re receiving about investing in DGGold using IRA funds has been tremendous,” said Mark Furmanek, chief operating officer of Dillon Gage Metals. “I feel the investment community truly appreciates the value and opportunity it delivers to investors. If you’re a gold investor, ask your IRA administrator to take an informed look at DGGold.”

What this breakthrough alternative IRA asset allows investors to do is use retirement funds to digitally track and accumulate .9999 pure physical gold. One hundred percent of the invested gold is stored in the highly-secure vaults of the Royal Canadian Mint, and physical gold ownership is tracked to the 1/1000th of an ounce using a cryptographically-secure Blockchain powered by Tradewind.

DGGold is available for purchase on [IRAConnect.com](#) and through Dillon Gage’s online trading portal, FizTrade—a robust wholesale trading platform available to all account holders. Participating self-directed IRA custodians are responsible for the IRS reporting and custody of DGGold. Both custodians and IRA holders can audit holdings 24/7.

For more information about DGGold, contact Mark Furmanek, chief operating officer, at 800-375-4243 ext.1152.
