

Air and Surface Disinfection Systems Installed Throughout Malaysia *ActivePure Technology is Added to Health and Safety Protocol at Six Malaysian Properties Amid the Pandemic*

DALLAS (Oct. 21, 2021) - [ActivePure](#), the global leader in active surface and air purification technology, announced today that its disinfection systems are installed in several high-profile locations throughout Malaysia. ActivePure provides an extra layer of protection against the coronavirus, an airborne virus that easily spreads in enclosed spaces.

ActivePure partnered with local distributor [Agrow Healthtech Sdn Bhd](#) to install its products, namely the Aerus PureCloud, Induct 2,000, Induct 500 and the Aerus Pure & Clean. Agrow Healthtech is a wholly owned subsidiary of Agrow Corporation, a wholly owned subsidiary of OCB Berhad, a publicly listed group in the KL Stock Exchange. OCB Berhad is a Malaysia-based investment holding company. The company's segments include building materials, bedding products, consumer foods and others. OCB Berhad's subsidiaries include Dreambed (Malaysia) Sdn. Bhd., Bedco Sistem (M) Sdn. Bhd., Kingkoil Corporation (M) Sdn. Bhd. and Acrowyn (M) Sdn. Bhd.

Locations in Malaysia that have installed ActivePure include the following:

- The Sunway Group, one of the largest conglomerates in Malaysia with significant operations in property development, construction, retail shopping malls, education facilities, hospitality, healthcare, manufacturing, and IT services, has installed Aerus Pure & Clean powered by ActivePure in twelve of their property sales galleries. Sunway Property is the property arm of Sunway Group, established in 1974, and is now one of Malaysia's top multinational property-construction corporations, with businesses in 50 locations worldwide across 12 industries.
- The Toyota Service Centers in Kuala Lumpur have Aerus Pure & Clean powered by ActivePure units in their service centers. Additionally, Aerus Mobile powered by ActivePure is also available for installation in customers' vehicles through Agrow Healthtech, which has partnered with Toyota Service Centers.
- SNT Global Logistics, a premier omnichannel fulfillment service provider in Southeast Asia that provides services for both online and offline retail businesses, has installed PureCloud units powered by ActivePure.
- The Westports logistics facility in Port Klang, one of the three main ports in the Straits of Malacca, handles gateway and transshipment container cargo. The location is near the main shipping route along the Straits of Malacca. Units powered by ActivePure, include the Aerus Pure & Clean, PureCloud and Induct models, were installed in their Port Operations building.

ActivePure is installed throughout Em Hub Kota Damansara

ActivePure is installed throughout The Toyota Service Centers in Kuala Lumpur

- Em Hub Kota Damansara is a unique e-commerce, retail and logistics hub featuring a drive-up ramp design. The design allows cars and lorries to enter the building, drive up to the designated floor, and load or unload goods before exiting. The building will feature Induct 500 units in all elevators, and all Phase one tenants will receive Pure & Clean powered by ActivePure units.
- Amaya Saujana Condominiums, the first private, high-end condo project in Saujana, installed Induct 500 powered by ActivePure units in its residential elevators.

The installation of ActivePure's products has been met with overwhelming enthusiasm, especially from the high traffic facilities throughout the country. "We are delighted to see businesses and residences adopt a higher standard of indoor air quality with ActivePure," said Robert Wong, managing director of Agrow Healthtech Sdn Bhd. "We are proud to supply Malaysian businesses with ActivePure products and play a meaningful role in mitigating the spread of harmful surface and airborne pathogens."

"Agrow Healthtech and their team in Malaysia have launched a business revitalization program to offer an extra layer of protection to businesses. We are extremely proud to partner with Agrow Healthtech in providing the industry best solutions for air and surface purification with ActivePure," said Anil Agrawal, vice president of international sales and operations of Activepure.

"As ActivePure expands in the international market, we are grateful to have partners like Agrow Healthtech who are committed to providing businesses and customers with the highest level of protection against airborne and surface contaminants," said Joe Urso, chairman and chief executive officer of ActivePure. "Our recent growth in Malaysia is a testament to the country's commitment to mitigating airborne spread and providing peace of mind during COVID and beyond."

ActivePure is a science-driven company that has developed a one-of-a-kind technology that works 24/7 to proactively inactivate pathogens, including mold spores and other bacteria and viruses known to cause healthcare-associated infections (HAIs.) ActivePure has received over 130 patents with 70 plus in the United States and 60 plus internationally.

With origins in the U.S. space program, ActivePure's patented technology releases thousands of submicroscopic particles that actively target pathogens in the air and on surfaces, inactivating them on contact and turning them into harmless byproducts.

###

ABOUT ACTIVEPURE:

Privately held ActivePure has been the global leader in active, continuous surface and air disinfection systems for healthcare and educational institutions, commercial and public facilities, hospitality and residential applications since 1924. It is the only product in its class recognized by the Space Foundation as Certified Space Technology and included in the Space Foundation Hall of Fame. The ActivePure Medical Guardian is registered and cleared as an FDA Class II Medical Device. ActivePure has origins in U.S. space program research and has since evolved for use in consumer products to reduce exposure to many common pathogens, including RNA and DNA viruses, bacteria and molds, by up to 99.9% in the air and on surfaces.
