

Extra Cab Space for El Paso, Texas

BIRMINGHAM, Ala. (June 19, 2017) – The City of El Paso recognizes that driving a [garbage truck](#) all day is one of the toughest jobs in the business. That’s why it’s so important for their drivers to have the space they need to get the job done, safely and efficiently, no matter how long the route – and that’s why they chose [Autocar trucks](#).

For El Paso, cab size was one of the most important factors when they decided what refuse trucks to purchase. So when we sat down with their team to discuss their needs, it became clear pretty quickly that Autocar was the perfect fit.

“We decided to standardize our chassis. We chose Autocar because of the latitude of options we get. For example, cab size was critical. We have some big drivers that need a lot of space and the Autocar cab provides the space and comfort that others don’t,” said Richard Adams, Solid Waste Operations Manager for the City of El Paso.

It’s just a fact that Autocar trucks have the biggest cabs in the refuse business. The Autocar ACX® has more hip room. More leg room. More room for bellies and knees. There’s tilt steering, ergonomic controls, high-power HVAC with vents in the right places, and an entire array of features to make sure your drivers are focused on the job – not on aching joints or strained muscles. And the Autocar ACMD® handles a 3-man crew, no sweat.

That’s what makes Autocar trucks more productive - and makes life easier for the drivers of El Paso, Texas.
